Abhishek Chand
Full Stack Web-Developer | UI-UX Designer

After discovering my passion for web development when I was in 8th standard , I couldn't get enough. I made several websites as projects and now I'm looking forward to bringing that passion to a full-time role.

PERSONAL PROJECTS

Journally (01/2020 – 03/2020)
- Journally is a blogging application as well as a news source platform where a reader has access to several articles and a writer can read as well ass write articles about any field or topic. This application is based on Angular, NodeJS, MongoDB, Mongoose and Express.

Private Chat App (07/2019 – 07/2019)
- It is a web chatting application where you can join rooms and chat with people that are already in that room. This application is suitable for both mobiles and laptops. This application is made with the help of NodeJs and SocketIO

Snapshop (09/2018 – 11/2018)
- Snapshop is an e-commerce platform where you can buy products. This project also consists of payment integration features with the help of PayUMoney. It also contains an admin account from where he/she can add several products to the actual website and also update and delete them.
